SUMMARY

Multidisciplinary technologist blending **iOS development, AI engineering, and product management**. Currently a Learner at the **Apple Developer Academy** (BINUS, Cohort 9), building native iOS apps with Swift and SwiftUI while applying AI/ML to real product problems and driving features from concept to launch. Diploma in Computer Engineering, with prior experience across enterprise SAP B1 integration, full-stack web (Next.js), Flutter mobile, and IoT.

CORE SKILLS

iOS Development: Swift, SwiftUI, UIKit, Combine, Core Data, SwiftData, SpriteKit, ARKit, RealityKit, watchOS, App Store Connect, Xcode

AI Engineering: Python, Prompt Engineering, LLM Integration (OpenAI / Claude), RAG, LangChain, Hugging Face, PyTorch / TensorFlow, Pandas / NumPy, Vector DBs (pgvector / Pinecone), OpenRouter API

Product & Design: Product Thinking, Design Thinking, Challenge-Based Learning, UI/UX, Rapid Prototyping, Figma, Agile Collaboration

Full-Stack & Other: Next.js / React, TypeScript, Flutter / Dart, Tailwind CSS, Supabase / PostgreSQL, Firebase, REST APIs, SAP B1 (C# / .NET), Git

EXPERIENCE

Learner — Apple Developer Academy

BINUS · Cohort 9 | Mar 2026 – Present

- Building native iOS apps with Swift and SwiftUI through Apple's Challenge-Based Learning curriculum.
- Applying design thinking and UI/UX to turn real-world problems into intuitive products.
- Collaborating in multidisciplinary teams (design, tech, product) to ship apps end-to-end.

SAP B1 Technical Consultant — Soltius Indonesia

Aug 2025 – Mar 2026

- Developed custom Add-ons and modifications using the SAP B1 SDK (C# / .NET).
- Optimized stored procedures, views, and complex queries for SAP HANA and MS SQL Server.
- Integrated SAP with AI systems; built reports (Crystal / HANA) and provided advanced technical support.

IT Officer — PT Duta Kecantikan Indonesia

Jan 2023 – Apr 2023

- Built and launched a WordPress marketplace (dutacantikindonesia.com); maintained network, hardware, and NComputing.

SELECTED PROJECTS

Nusantara Chess (iOS). 3D chess game in SwiftUI + RealityKit with a Negamax + alpha-beta AI (3 difficulty levels) and a Majapahit vs Sriwijaya cultural theme.

Jarvis — Virtual Pet Wellness Assistant (iOS + macOS). Habit-building virtual pet using SwiftUI, SpriteKit, ActivityKit (Live Activities), and AppKit for a desktop Buddy Mode.

Hello Coach (iOS + watchOS). Push/pull workout tracker with SwiftData persistence and training-volume analytics across muscle groups.

Karir AI (AI). LLM-powered career-guidance mobile app integrating OpenRouter for chat-based recommendations. Flutter.

Plate Recognition (AI). License-plate OCR pipeline with Python, OpenCV, and Tesseract, served to a Flutter client over REST.

Holticura (IoT). Smart horticulture monitoring with ESP8266 sensors and Blynk. Arduino / C++.

HONORS & COMPETITIONS

- Hacker** — Kompetisi Innovator Muda (2024): built a full business case and working prototype (SiapAda) in one day.
- Front-End Developer** — GOTO Hackathon (2023): built and pitched a mobile marketplace app in one day.

ADDITIONAL EXPERIENCE

- Traffic Officer** — Freelance (JMTO) · Apr 2024 – Apr 2025 — managed toll-road traffic control during peak holiday season.
- Voting Committee (PPS)** — KPU, General Elections Commission · Jun 2023 – Jan 2024 — organized and supervised transparent local voting.
- IT Helper** — PT Batik Organik · Mar 2023 – Oct 2023 — digitalized product inventory and migrated the database to a cloud server.

EDUCATION

Diploma in Computer Engineering — IPB University

Aug 2019 – Sep 2022 | Focus: IoT, hardware programming, and software development

LANGUAGES

Indonesian (Native) • English (Professional working proficiency)
